## Car Detailing right on Target

Michael Dale started working at Target Collision Repairs located in North Laverton four years ago. Michael completed a three year Traineeship in Car Detailing. Michael occasionally helps out with Panel Beating when required, one day Michael hopes to fulfill his goal of moving into Panel Beating.

Watching Michael work it becomes obvious that he takes a lot of pride in what he does. He is very knowledgeable in all the products he uses for his work. Depending on the need Michael says "It takes around 45 minutes to 1 hour to complete the detail per vehicle".

When asked what is the best thing about working at Target Collision Repairs his response was 'The best thing about working here is the cars'. It is obvious that cars are a passion of Michaels.

Other responsibilities of Michaels are parking all the cars in the lot at the end of the day. This takes a lot of skill, especially when the company has a lot of cars in for repair. It can become very tight for room.

Graham of Target Collision said they are extremely happy to have Michael working for them. He has been an excellent match to the job. Michael is very reliable; we wish we could find more workers just like him, he has been the longest serving Detailer the Company has had. It is going to be very difficult replacing Michael if he moves into Panel Beating, because he is so good at his job.
